Semantia has a long history of solving complex problems for businesses small and large

Over the last 20 years we've created 25 award winning, industry changing technology solutions that revolutionised the companies that use them. Every single solution, started as just an idea...

WHAT'S YOUR IDEA?

Describe the software, app or interface you want to build

What does it need to do? What other software or systems does it need to work with? What does it look like?

Provide an example(s) of something that is "exactly what we want".

Tell us what you'd want to change about it

If there isn't anything that's exactly what you want, provide an example of what inspired you and describe how it would be changed to suit you.

Provide a URL and describe what you'd want to change.

Choose the 3 words that best express the design style you want for your software, app or interface

- | | | | |
|--------------|------------|--------------|---------------|
| ARTISTIC | EDGY | MODERN | SMART |
| BASIC | ELEGANT | NATURAL | SOPHISTICATED |

or pick 3 of your own

Provide an example(s) of something that has "a great design we'd like to replicate".

Tell us which bits you don't like, what's missing or needs to be changed

Provide a URL and describe what would make it better

Describe the situation you want to solve with the software, app or integration interface

What is the problem? How is it holding you back? How does the situation impact your business?

Describe any process or system you are currently using when you have to deal with this situation

How many people does it involve? How long does it take? What problems does the current approach create?

Choose the 3 phrases that best reflect the results you want to achieve with your software, app or interface
